Professional Summary

Acumatica-certified Functional Consultant with hands-on expertise implementing and optimizing Acumatica Construction Edition and Field Services for construction, roofing, and professional services organizations. Experienced in leading ERP implementations from requirements gathering through go-live, user adoption, and post-implementation support. Strong background in business process analysis, workflow design, reporting, dashboards, Business Events, import scenarios, and cross-functional stakeholder collaboration. Recognized for delivering practical, scalable solutions that improve operational efficiency, financial visibility, project controls, and field service execution.

Professional Experience

Global Now, Inc. / Revive ERP

External Contractor – Acumatica Functional Consultant | July 2022 – Present

- Lead functional consulting engagements focused on Acumatica Construction Edition and Field Services implementations and rescue projects.
- Conduct discovery sessions, analyze business requirements, configure workflows, and provide end-user training and post-go-live support.
- Resolved critical Field Services process issues for a client transitioning from a previous Acumatica VAR, including non-stock item setup, appointment workflow redesign, and invoice template corrections.
- Implemented Acumatica Construction Edition for a construction company migrating from paper-based field operations, covering timesheets, purchase orders, expense reporting, and project budgeting.
- Designed import scenarios enabling project managers to upload project budgets from Excel directly into Acumatica.
- Created Business Events and automation processes to support project change order creation and daily WIP adjustment transactions based on client-specific calculation rules.
- Developed role-based project access maintenance processes using Business Events and Row-Level Security (RLS) concepts.
- Built RPX project reports with subreports to consolidate operational and financial information into executive-ready outputs.
- Implemented Acumatica Construction Edition for an IT outsourcing company with project accounting and subcontractor time-entry integration.
- Created Business Events that generated project transactions from subcontractor time entries and integrated them with AP Bills through import scenarios.
- Configured Velixo financial reporting with write-back functionality to improve budgeting and financial analysis processes.

ROOFCORP

Director of Special Projects / ERP Implementation Lead | September 2019 – June 2022

- Served as the internal ERP implementation lead for Acumatica Construction Edition with Field Services for a roofing company.
- Coordinated implementation activities across accounting, operations, project management, and field service departments.
- Designed Business Events and import scenarios to automate journal entry creation from Field Services time-card transactions to the general ledger and subledger accounts.

- Customized ARM financial reports and lien waiver forms to meet operational and compliance requirements.
- Developed RPX-based sales proposal documents and implemented custom fields to support business-specific processes.
- Built Generic Inquiries that linked Acumatica records to external project photo gallery websites for improved project visibility.
- Implemented Power BI mapping solutions for service ticket locations, improving dispatch planning and technician scheduling efficiency.
- Configured opportunity workflow enhancements and developed executive dashboards for sales and marketing performance tracking.

Education

- University of California, Irvine – Project Management Capstone | 2015–2016
- Brawijaya University, Malang – Faculty of Natural Studies | 1994–1999
